Welcome from the CEO

Happy new year to all. I hope 2011 will be all about getting the work/life balance right. It is looking like a great year to do just that. I have already taken up walking. Sort of. I walk away from the TV whenever another Aussie wicket falls. I suppose it's all for the good. A period of regrowth for our cricket team and of constant bragging from our pommie mates. Let's hope we push their scrum around at World Cup time.

I understand that sporting achievements especially on the world stage can have dramatic and positive effects on a nation. Even positive effects on the economy. Although it seems we are a pretty complacent lot here in Australia. Whether we win or lose we go about our daily grind regardless.

My team are back at work now after a refreshing break and they are already kicking goals.

Our apprenticeship scholarship scheme, KIKASS has started for 20 school leavers with disability and we expect great things from them in 2011. Their employers are happy too with me paying their KIKASS apprentices wages for the year. Check out the details in the first Key News for 2011.
